# Silage Fertilizer Grades

**YaraMila™**  
SILAGE BOOSTER  
(20-4.5-14.5 + 7.5%  
SO<sub>3</sub> + Se)

is a compound NPKS fertilizer enriched with selenium to boost levels in livestock through grass silage

**YaraMila™**  
NK SULPHUR  
(24-0-13 + 5% SO<sub>3</sub>)

is a compound fertilizer for silage crops grown on soils where phosphate is not required, and where potash and sulphur are necessary to supply the high demands of your silage crop.

**YaraMila™**  
52 S  
(20.6-8.2-11.6 + 6.5% SO<sub>3</sub>)

is a compound NPKS fertilizer, which is suitable on silage crops especially where organic manures are not available or where you are building soil P & K fertility.

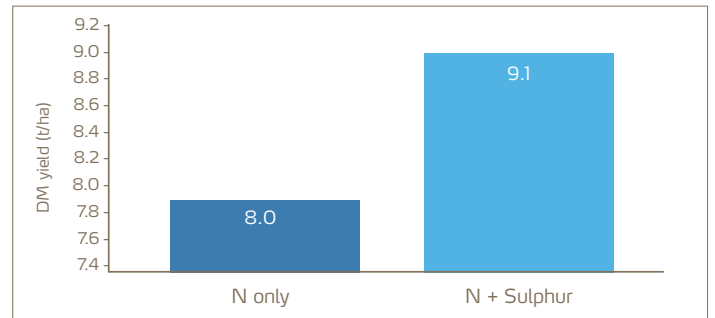

## Sulphur

All Yara Silage grade fertilizers contain sulphur

Sulphur increases nitrogen use efficiency, giving you more for your money. It is immobile in the plant and therefore a constant soil supply is required. It is therefore recommended to apply your sulphur, as part of a complex compound fertilizer, little and often throughout the growing season.

### Effect of sulphur applications on grassland

Ref: Yara / AFBI trials 2017  
NOTE: the N + Sulphur product used is YaraBela NUTRI BOOSTER

## Complex Compound Fertilizer

As a complex compound fertilizer every granule or prill guarantees the correct nutrient analysis.

Ensuring you have uniform coverage across the entire field.

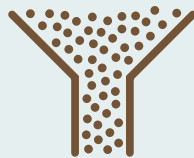

Every granule or prill delivers precisely what is needed for immediate uptake and grass growth.

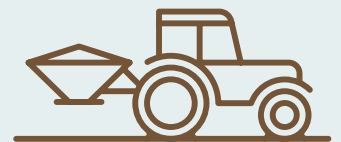

## Spreading Characteristics

In addition to the technical benefits awarded by a compound fertilizer there are practical benefits too. There is zero segregation of nutrients within the spreader.

Your spreader setting, once selected, will be accurate for every granule or prill across the entire bout width. Our quality products spread further allowing for a wider bout width, therefore saving you time.

## The Yara Guarantee

All Yara silage grade fertilizers are quality guaranteed.

They are formulated to the declaration, so you can be sure you are getting exactly what you pay for.

What's more the product comes with full traceability from factory to field.

With Yara fertilizer **What's on the bag, is in the bag.**
